

## 3D Connexion -A World of 3D Capabilities...

3Dconnexion's award-winning 3D navigation devices unlock the true power of 3D applications. Whether you are flying through three-dimensional worlds or manipulating 3D objects, you will experience an addictive level of control. Get 50% fewer mouse clicks and 20% greater productivity using a 3Dconnexion navigation device.

### SpacePilot

SpacePilot is a true breakthrough in the world of natural, intuitive user-interface devices. With its adaptive sensing technology commands become available on the LCD and dynamically update when you switch applications or work modes within an application. Plus, its six-degrees of freedom optical sensors, 21- key console and ergonomic design combine to deliver unprecedented control and fewer distractions.

### SpaceExplorer

SpaceExplorer is the hands-down winner when it comes to mid-priced 3D navigation devices for design professionals. SpaceExplorer can be used by either hand comfortably and features an array of easy-to-reach function keys labeled and pre-programmed with commands from leading design applications.

### SpaceNavigator

SpaceNavigator makes advanced 3D navigation accessible and affordable for architects, artists, designers, enthusiasts, students and anyone else who wants to enjoy the 3D experience using Google Earth, SketchUp, or more than 100 of today's most popular and powerful 3D applications.

### SpaceNavigator for Notebooks

SpaceNavigator for Notebooks is the perfect travel companion for 3D designers and enthusiasts. Designed for mobile professionals and enthusiasts, the compact SpaceNavigator for Notebooks is only half the weight of its desktop counterpart. A small footprint makes it easy to use-even on airline trays-and a handsome travel case makes transport a snap.
